

NEW STUDY FINDS OPTIMAL ENG STUDENT DIET

As the engineering work load increases, students are searching for ways to stay on the top of their game. Could this new diet provide that push to get through the day? More on Page 2.

New Eng Diet on the Rise

By Frank Goodfellow

As the semester begins to pick up, eng students are finding themselves genuinely tired rather than hungover. Nutritionists around the world have been puzzled on how to create a diet that can suit this demanding lifestyle while also incorporating the much needed alcohol students seek. Luckily, researchers at the U of G College of Engineering have stumbled across a more traditional method. Studies have shown an increase in productivity amongst students who consume a combination of burgers, beer, and most importantly corn.

After seeing these results, the Engineering Society has decided to increase accessibility of this diet for as many students as possible. Executive members are urging people to purchase tickets as soon as possible to this years Corn Roast. Tickets will include access to an evening of food, live music, ciders and beer and obviously corn. Tickets are available online and in person at the EngSoc Office beside the Atrium. For more information, please contact your local nutritionist (Bunsen).

Fall Listening

By Eva Cuddihy

It's officially autumn. You're back in the G-spot (Guelph). You're getting into the swing of things. Here is a fall playlist I made that isn't completely devastating (ie no Phoebe Bridgers/Cigarettes After Sex)

Stay by Leith Ross

Leith Ross just released their new album and it is bomb asf

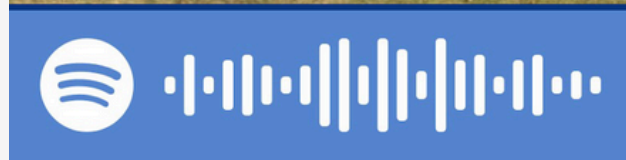

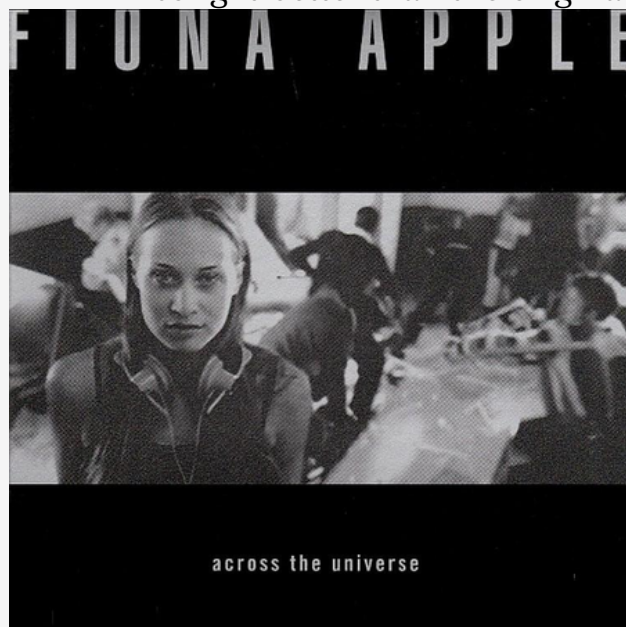

Ballad of Big Nothing by Elliot Smith

He is so autumn-coded and this is the least gut wrenching song

Across the Universe by Fiona Apple

Kinda crazy that a cover of a Beatles song is better than the original

FULL PLAYLIST ON SPOTIFY

Trampolines the New Student House Must Have?

By Franklin Goodfellow

If you know me personally, you may know that the backyard of my student house now has a big trampoline. Since this big change in my life, I'm now better than you. You may be thinking to yourself, "wow, I wish I could be so fortunate to have a trampoline just steps away from my back door, that's my dream". In the rare case that this isn't your immediate thought, let me fill you in on why this is such a must have.

- **It's Awesome**

Very rarely does someone look at a trampoline and say, "BORING". Even the biggest sticks in the mud will soon be grinning ear to ear from the joy that is a trampoline. You simply cannot stop the indomitable trampoline spirit.

- **Trampoline Parties**

Nobody wants to go to the same old bars these days. Too many first years and it costs an arm and a leg for a drink. On top of all this, there's no trampolines. If you want to take your function from a linear to an exponential, get a trampoline and people will be talking about it for weeks.

- **Multiple uses**

Grass is the past, laying on a trampoline on a nice autumn day is the future. Aside from bonfires, child birth, and cooking dinner, you basically do everything on a trampoline.

- **Social Status**

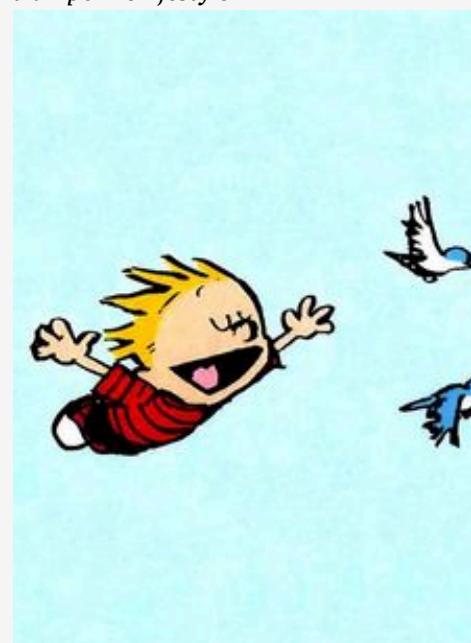

There is no higher status than that of a person with a trampoline. People walking by on the sidewalk have nothing but wonder in their eyes when they watch you bounce above the fence every other second.

- **Cures Cancer**

Well no not really but you considered it for a second didn't you?

Now that your eyes have been opened to the paradise that is trampoline living, you're likely dying to get your very own. Well fortunately, Kijiji and Facebook Marketplace are full of free trampolines. Act fast though, the demand is growing fast as the Tramp style takes over.

Below: Artists illustration of the trampoline lifestyle

I WANT YOU TO WRITE FOR O'SNAP

O'SNAP is written by engineering students for engineering students. If there is any spark of creativity in your brain don't hesitate to use it. Articles can literally be anything you want that students would read. Examples include: real world engineering news, campus happenings, student lifestyle pieces, opinion pieces, satirical articles, cooking recipes, bar reviews, student life tips and trick; the list goes on and on.

INTERESTED?

O'SNAP will be released every other Wednesday (Tuesday was too busy for me) all fall semester, continuing from this release on the 24th. If you have any interest in writing, helping format, or volunteering with O'SNAP, reach out! Email Frank the editor at fgoodfel@uoguelph.ca or shine the O'SNAP logo into the sky at night.

HELP MAKE ENGINEERING MORE ACCESSIBLE!
FOR YOURSELF & OTHERS

How to Spot an Engineer

By Eva Cuddihy

It's 5:00 pm on a Wednesday. You're drowning in homework and need help with a bending moment diagram from a classmate. You see an awkward student standing at the bus stop, but how can you be sure if this is a fellow engineer or just a rando? Here is a simple, foolproof method to determine if you have a genuine, insufferable, stinky nerd on your hands.

Begin by taking a look at what your subject is wearing. Some articles of clothing are deeply engineer-coded, such as coveralls or a hideously expensive leather engg jacket. Others may be more subtle, like a shirt with a gag-inducing math pun, or pants with a suspicious number of pockets. For those with a keen eye or a habit of staring at feet, you may notice the small green tag on the shoes of your target. Steel toe boots are an engineer's calling card if you catch them on their way to or from Ye Olde Machine Shoppe.

Try to catch a glimpse of their phone, and keep your eyes peeled for a few key apps. Desmos, Phyphox or MatLab Mobile may point you in the direction of B.Eng. If Maps is open, see if they are headed to a LCBO or therapy office. If you spot Hinge, Bumble or Tinder, it's time to abandon ship, as you're barking up the wrong tree.

Next, take a small, non-creepy whiff in their direction. Notes of metal, sawdust, or climbing chalk are strong indicators of an CoE pupil. Any hint of deodorant means you have grossly miscalculated.

If they have no light in their eyes, are sleeping in an unconventional location or have greying hair, this is valuable to note but do so cautiously: while nearly all engineers are unhappy, not all unhappy people are engineers. Remember, this is university - lots of people are miserable.

If two or more of the above traits are evident, you have most certainly found an engineer in the flesh. Be sure to approach slowly so as to not startle them with an unplanned social encounter, or perhaps give them some caffeine as a peace offering.

Bi-Weekly Meme Recap

To Be Frank, Issue #2: I Give Up

By Franklin Goodfellow

To Be Frank is this years version of an editorial. I (Frank) have set aside time every other week to enjoy a beer at Brass Taps and write about whatever is on my mind.

Yeah I've had enough. Week 3 and I'm having to tap out already. You might think this is a bit preemptive of me to lose hope but do not fret. I simply just have no idea what to talk about for this weeks edition of To Be Frank. I'm sure I'll come up with something two weeks from now. Ok sure, this is basically an excuse for me to drink a beer at Brass Taps every other week and say I'm "working", but is that really such a bad thing? Maybe for right now, you, dearest reader, should do the same. Go get a beer. Right now. GO!

Beer of Paper #2: Gryphon Gold Helles Lager

When I saw the promo for this beer last year, I honestly imagined it to be pure pisswater. This instead was a pleasant surprise. A nice crisp lager that I would definitely have again.

EngSoc Budget Exceeds \$500,000 in Biggest Year Yet

By Franklin Goodfellow

In last weeks regularly scheduled fall semester budget meeting, the Guelph Engineering Society hit a record high budget. Among the larger expenses, here were some of the highlights:

- \$11,999 for a new Samsung Smart Fridge to replace the broken EngSoc office fridge.
- \$3,400 in premium pre-shucked corn for Corn Roast
- \$2,200 for a new gen Chromebook for meeting minutes recording
- \$348 for air fresheners spread amongst the engineering building
- \$500 budgeted for deodorant propaganda and giveaways
- \$4,000 in monthly trademark expenses for use of the EngSoc logo (owned by a student of class of 2006)
- \$200,000 for a trampoline floor installation in the atrium
- \$1 in snacks for the office staff

It's hard to say where the budget could go next year or even next semester. With an increase in first year acceptances, some argue large budgeting is justified while others question the legitimacy of expenses. One question still remains though, are YOU getting what you paid for? Consider talking to your year rep.

Biological

You may find yourself surrounded by naysayers this week. Don't let other tell you what you're capable of. You define your future and can do great things. Eat 10 cobs of corn at corn roast and don't let anyone stop you.

Biomedical

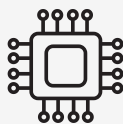

Be strong willed this week Biomedical, stand for what you believe in. Even if you're an idiot, its better to stand for something than to stand for nothing. Tell everyone how your ex was the problem, you're perfect just the way you are.

Mechanical

Ok time to actually lock in. For real this time. No more fooling around. You're gonna do some practice questions and get ahead this week. For sure . . . right after this game of Clash Royale though.

Computer

Its time to settle into the flow of things. Become more comfortable with your surroundings and get ready for the long haul. Time for your last underwear change before christmas.

Mechatronics

Be patient this week Mechatronics. Your days of saying "yes that's the new one" every time someone asks what discipline you're in are far from over.

Environmental

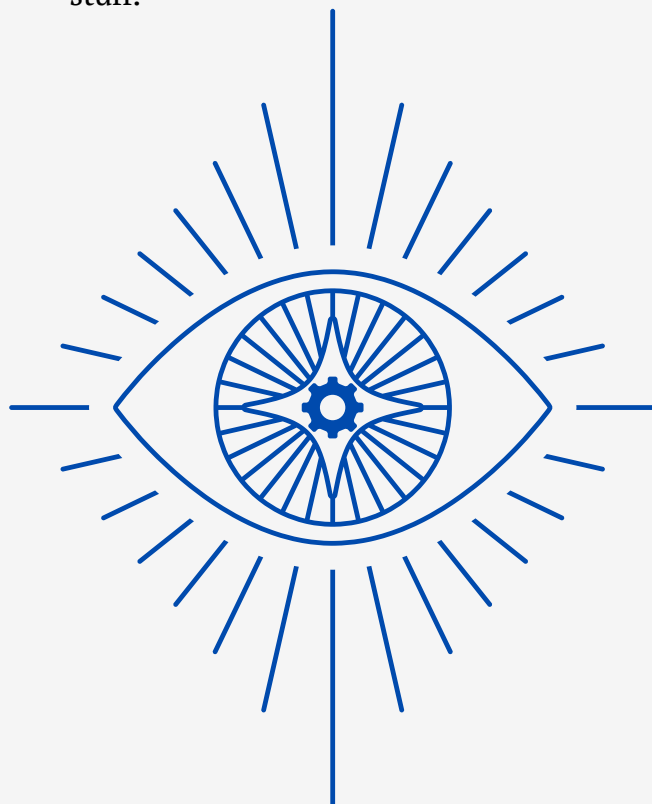

DO NOT TEXT YOUR EX. DO NOT TEXT YOUR EX. DO NOT TEXT YOUR EX. DO NOT TEXT YOUR EX. DO NOT TEXT YOUR EX. DO NOT TEXT YOUR EX. DO NOT TEXT YOUR EX. DO NOT TEXT YOUR EX.

Water Resources

Take time to be joyous this week. Quite honestly you should be thrilled! It's gonna rain like 4 times this week. You love that stuff.

dear BUNSEN...

Have a question you're too scared to ask your professors, classmates, housemates, or parents? Ask your friend Bunsen - rich in experience (and wit). No question is too unusual or outlandish. Just don't come running back crying if the answer isn't what you expected. The truth can be a hard pill to swallow.

Dear Bunsen.

Who are you? How do I know you can be trusted?

Dear secret admirer

I am the wind on a cold campus day, and the smell in your mechanics lecture. My wisdom exceeds all known genres and subjects. I have forgotten more than you'll ever know.

-Bunsen

*Have a question for Bunsen?
Email submissions to the editor
or leave a note titled "Dear
Bunsen..." at the Engsoc office.*

Dear Bunsen,

I missed the deadline on my first assignment. It was worth 1% but I feel so incompetent now. What should I do?

Dear dropout,

1% is basically 50% so I'd recommend going to Walmart and asking if they're hiring.

Bunsen, 0.01 GPA

Dear Bunsen,

I hooked up with a girl down the hall from me and res but now she won't leave me alone. She says I'm the best she's ever had.

Signed,
Anonymous

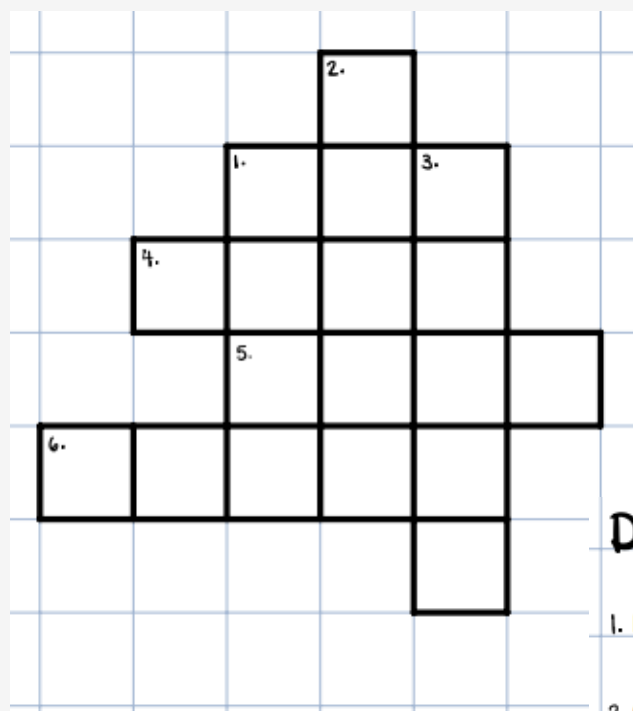

Dear performative male,

I believe Johnnie Cochran more than I believe you. Get a grip

From, Bunsen

CROSSWORD

By Nola Hinton

ACROSS

1. A deer, a female deer.

4. Food and a crazy handlebar mustache can be found here (with 1 down).

5. Hot & emo.

6. Green sauce that thinks it's better than marinara (it is).

DOWN

1. Food and a crazy handlebar mustache can be found here (with 4 across).

2. Can be used to optimize manufacturing processes (take jobs).

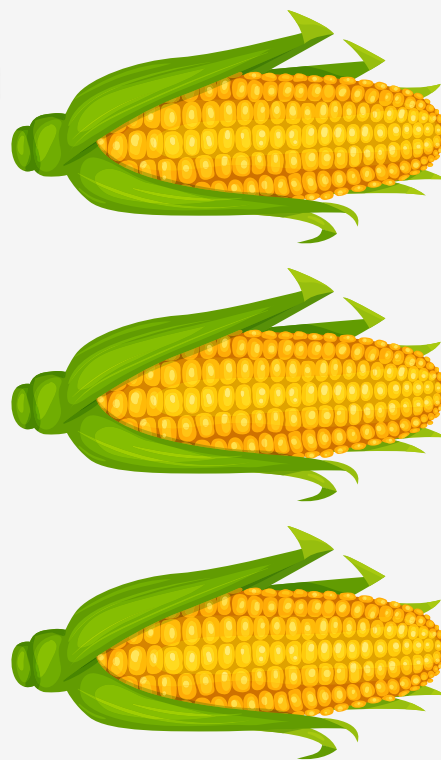

3. The big red button that cuts power.

Calling all students (especially you, engineers!) - can you read, write, or use a camera? Have some opinions you think the entire CoE should know about? Okay with working for free on top of paying thousands of dollars to do school work that will never help you in your day-to-day life? If you think you have what it takes, email submissions to fgoodfel@uoguelph.ca. Opinion pieces, conference reflections, advice, memes, comics, and more are all welcome*. Submissions for the next edition are due on September 21st. Submissions can be published anonymously or under a pseudonym (For the mechs, that means a fake name).

*Subject to reasonable limits. No eroticas please!
